

Mueller Water Products Reports 2019 Fourth Quarter and Fiscal Year Results

f y in

November 05, 2019

Increased Net Sales 5.0% in Quarter, 5.7% in Fiscal Year
Earned Net Income per Diluted Share of \$0.25 in Quarter, \$0.40 in Fiscal Year
Delivered Adjusted Net Income per Diluted Share of \$0.19 in Quarter, \$0.61 in Fiscal Year

ATLANTA, Nov. 05, 2019 (GLOBE NEWSWIRE) -- Mueller Water Products, Inc. (NYSE: MWA) announced today that for its fiscal 2019 fourth quarter ended September 30, 2019 net sales were \$266.9 million and net income was \$40.2 million.

In the 2019 fourth quarter, the Company:

- Increased net sales 5.0 percent to \$266.9 million as compared with \$254.3 million in the prior year quarter.
- Generated operating income of \$39.0 million as compared with \$40.5 million in the prior year quarter and adjusted operating income of \$42.6 million in the current and prior year quarters.
- Recorded \$16.4 million net favorable adjustment to the Walter Energy Accrual based on an agreed settlement.
- Reported net income of \$40.2 million as compared with \$25.0 million in the prior year quarter. Increased adjusted net income 10.4 percent to \$29.6 million as compared with \$26.8 million in the prior year quarter.
- Reported net income per diluted share of \$0.25 and adjusted net income per diluted share of \$0.19 as compared with net income per diluted share of \$0.16 and adjusted net income per diluted share of \$0.17 in the prior year quarter.
- Increased adjusted EBITDA 6.0 percent to \$56.9 million as compared with \$53.7 million in the prior year, yielding an adjusted EBITDA margin of 21.3 percent as compared with 21.1 percent in the prior year.

In the full fiscal year, the Company:

- Increased net sales 5.7 percent over the prior year to \$968.0 million.
- Generated net income of \$63.8 million as compared with \$105.6 million in the prior year.

- Reported net income per diluted share of \$0.40 and achieved adjusted net income per diluted share of \$0.61, a 15.1 percent increase as compared with \$0.53 in the prior year.
- Increased adjusted EBITDA 10.1 percent to \$198.2 million as compared with \$180.0 million in the prior year, yielding an adjusted EBITDA margin of 20.5 percent as compared with 19.7 percent in the prior year.
- Generated operating cash flow of \$92.5 million and invested \$86.6 million in capital expenditures, resulting in \$5.9 million of free cash flow.

"Our teams finished the year well and remain focused on executing strategies to continue to grow the business, despite a more challenging operating environment relative to the prior year. I am pleased with how we responded to the challenges we faced this year evidenced by growing annual net sales by 5.7 percent, adjusted EBITDA by 10.1 percent, and adjusted net income per share by 15.1 percent," said Scott Hall, President and Chief Executive Officer of Mueller Water Products.

"We continued to grow the business in the fourth quarter, as we increased both net sales and adjusted EBITDA. Our consolidated net sales growth of 5.0 percent in the quarter was driven by the benefit of the Krausz acquisition and higher pricing. However, due to the slower-than-expected recovery in residential construction, lowered inventory levels in the channel, and a decrease in Canadian sales, our organic net sales decreased slightly compared with the 12.1 percent increase in the prior year fourth quarter. We continue to improve our gross margin as we delivered a 50 basis point improvement in the quarter, excluding the impact of the inventory step-up at Krausz. Our adjusted EBITDA margin improved 20 basis points to 21.3 percent.

"We continue to make progress on our strategies to strengthen and grow the business, which include accelerating product development, developing a fully-integrated technology platform for infrastructure monitoring, driving operational excellence and modernizing our manufacturing facilities. As our customers prioritize their need to analyze, repair and manage their aging infrastructure, we are ideally positioned to help solve their problems. At the 2019 WEFTEC conference, we introduced Sentryx™, a software platform that provides data intelligence to help water utilities make strategic and operational decisions. Our new technology-enabled dry and wet barrel hydrants serve as a communications backbone that houses data gathering sensors. This data includes leak detection, pressure monitoring, metering and water quality, which are aggregated and consolidated within the Sentryx™ platform, providing utilities with critical information regarding their distribution systems.

"In addition to accelerating new product development, our investments in our facilities and team members will improve our culture of execution and create a strong foundation for future growth. Our increased capital spending will continue in fiscal 2020 as we further expand our manufacturing capabilities around our Chattanooga operations to meet the growing demand for water infrastructure products as utilities repair and rebuild their aging infrastructure. We announced the closure of our Hammond, Indiana facility, which will be relocated to a new facility in Kimball, Tennessee. The new facility will enable us to drive additional efficiencies by insourcing certain activities and further

leveraging our large casting foundry. In addition, we expect to make significant progress on the construction of our new brass manufacturing facility in Decatur, Illinois.

"For fiscal 2020, we anticipate increased demand in our end markets with the municipal and residential construction markets growing in the low-single digit range. As a result, we expect to increase our consolidated net sales between 3 and 5 percent, with adjusted EBITDA growth between 4 and 8 percent. Going forward, with the support of our strong balance sheet, we will continue to maintain a balanced approach to capital allocation with a bias towards capital investments in the near term."

Consolidated Results

Net sales for the 2019 fourth quarter increased 5.0 percent, or \$12.6 million, to \$266.9 million as compared with \$254.3 million in the 2018 fourth quarter with growth in both segments.

Adjusted operating income was \$42.6 million in both the 2019 and prior year fourth quarters.

Adjusted EBITDA increased 6.0 percent, or \$3.2 million, to \$56.9 million as compared with \$53.7 million in the prior year quarter.

Segment Results

Infrastructure

Net sales for the 2019 fourth quarter increased 5.0 percent, or \$11.2 million, to \$234.7 million, as compared with \$223.5 million in the 2018 fourth quarter. This increase was due to the sales from Krausz Industries and higher pricing, partially offset by lower shipment volumes, as organic net sales decreased 1.3 percent in the quarter as compared with the prior year. The decrease in shipment volumes was primarily driven by the slower-than-expected recovery in residential construction, lowered inventory levels in the channel, and a decrease in sales in Canada reflecting the softer economic conditions and a weaker residential market.

Operating income was \$50.7 million and adjusted operating income, excluding Krausz inventory step-up amortization of \$2.3 million, \$0.6 million of strategic reorganization and other charges and a \$2.4 million gain from the sale of an idle property, was \$51.2 million in the quarter. Adjusted operating income increased 2.2 percent, or \$1.1 million, as compared with the prior year quarter, primarily due to higher pricing, improved manufacturing performance and the inclusion of Krausz Industries, partially offset by lower shipment volumes and higher costs associated with inflation.

Adjusted EBITDA of \$63.2 million increased 5.7 percent, or \$3.4 million, as compared with \$59.8 million in the prior year quarter.

Technologies

Net sales for the 2019 fourth quarter increased 4.5 percent, or \$1.4 million, to \$32.2 million, as compared with \$30.8 million in the 2018 fourth quarter. This increase was due to higher volumes at Echologics.

Operating income and adjusted operating income were \$0.8 million. Adjusted operating income increased \$0.5 million as compared with \$0.3 million in the prior year quarter, primarily due to lower SG&A expenses and higher volumes, partially offset by performance and higher costs associated with inflation.

Adjusted EBITDA improved \$0.8 million to \$2.8 million as compared with \$2.0 million in the prior year quarter.

Walter Energy Tax Liability Update

In September 2019, the Company reached an agreement with the Internal Revenue Service, Department of Justice and a third party whereby the liability associated with the Walter Energy tax liability and subsequent bankruptcy (the "Walter Tax Liability") was resolved. As of September 30, 2019, the Walter Tax Liability was approximately \$39 million. Under the terms of the agreement, a third party has agreed to contribute approximately \$17 million to the settlement and the Company will contribute approximately \$22 million. Accordingly, during the quarter, the Company reduced its Walter Energy Accrual by \$16.4 million, which included an accrual of \$0.5 million in additional interest expense.

The settlement agreement, which was filed and presented for approval to the U.S. Bankruptcy Court handling the Walter Energy bankruptcy and associated Walter Tax Liability, must be formally approved by the Bankruptcy Court. Although no assurances as to timing or outcome can be made, the Company expects that the Bankruptcy Court will approve the settlement of the Walter Tax Liability by the end of calendar 2019 at which point this matter will be fully resolved upon the Company's payment and execution of certain settlement documents.

Income Taxes

For the 2019 fourth quarter, income tax expense was \$11.4 million, or 22.1 percent of income before income taxes. This rate differs from the statutory rate primarily due to the effects of state income taxes, foreign rate differential and tax effects of discrete items.

For the fiscal year, income tax expense was \$18.3 million, or 22.3 percent of income before taxes. Excluding the one-time impacts from tax legislation, the effective income tax rate was 23.0 percent as compared with 26.2 percent in the prior year, primarily due to a lower federal statutory rate in 2019.

Full-Year 2020 Outlook

The Company's expectations for full-year 2020, which reflect the current business environment, are as follows:

- Municipal spending growing in the low-single digit range, residential construction growing in the low-single digit range and natural gas distribution growing in the mid-single digit range.
- Consolidated net sales growth between 3 and 5 percent primarily driven by higher shipment volumes.
- Growth in adjusted EBITDA between 4 and 8 percent (from \$198.2 million of adjusted EBITDA in 2019), based on the current outlook for net sales growth, product mix and inflation.
- Total SG&A expenses between 19 and 20 percent of consolidated net sales.
- Net interest expense between \$21 million and \$22 million.
- Effective income tax rate between 24 and 26 percent.
- Depreciation and amortization between \$60 million and \$63 million, and capital expenditures between \$80 million and \$90 million.

Conference Call Webcast

Mueller Water Products' quarterly earnings conference call will take place Wednesday, November 6, 2019, at 9:00 a.m. ET. Members of Mueller Water Products' leadership team will discuss the Company's recent financial performance and respond to questions from financial analysts. A live webcast of the call will be available on the Investor Relations section of the Company's website. Please go to the website (www.muellerwaterproducts.com) at least 15 minutes prior to the start of the call to register, download and install any necessary software. A replay of the call will be available for 30 days and can be accessed by dialing 1-888-566-0638. An archive of the webcast will also be available on the Investor Relations section of the Company's website.

Use of Non-GAAP Measures

In an effort to provide investors with additional information regarding the Company's results as determined under GAAP, the Company also provides non-GAAP information that management believes is useful to investors. These non-GAAP measures have limitations as analytical tools, and securities analysts, investors and other interested parties should not consider any of these non-GAAP measures in isolation or as a substitute for analysis of the Company's results as reported under GAAP. These non-GAAP measures may not be comparable to similarly titled measures used by other companies.

The Company presents adjusted net income, adjusted net income per diluted share, adjusted operating income, adjusted operating margin, adjusted EBITDA and adjusted EBITDA margin as performance measures because management uses these measures in evaluating the Company's underlying performance on a consistent basis across periods and in making decisions about operational strategies. Management also believes these measures are frequently used by securities analysts, investors and other interested parties in the evaluation of the Company's recurring performance.

The Company presents net debt and net debt leverage as performance measures because management uses them in evaluating its capital management, and the investment community commonly uses them as measures of indebtedness. The Company presents free cash flow because management believes it is commonly used by the investment community to measure the Company's ability to create liquidity.

The calculations of these non-GAAP measures and reconciliations to GAAP results are included as an attachment to this press release and have been posted online at www.muellerwaterproducts.com.

Forward-Looking Statements

This press release contains certain statements that may be deemed "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements that address activities, events or developments that we intend, expect, estimate, plan, project, believe or anticipate will or may occur in the future are forward-looking statements, including, without limitation, statements regarding our outlook, projections, forecasts, trend descriptions, go-to-market strategies, operational excellence, acceleration of new product development, continued growth in our end markets, net sales growth, organic adjusted operating income and adjusted EBITDA growth, capital allocation and growth strategies and future warranty charges. Forward-looking statements are based on certain assumptions and assessments made by us considering our experience and perception of historical trends, current conditions and expected future developments. Any such statements do not guarantee future performance and speak only as of the date they are made, and we do not undertake to update our forward-looking statements.

Actual results and the timing of events may differ materially from those contemplated by the forward-looking statements due to a number of factors, including, but not limited to: (i) regional, national or global political, economic, market and competitive conditions, (ii) government monetary or fiscal policies, (iii) changing regulatory, trade and tariff conditions and policies and their impact on demand for our products and our competitive position, (iv) cyclical and changing demand in core markets such as municipal spending, residential and non-residential construction, and natural gas distribution, (v) manufacturing and product performance, (vi) expectations regarding higher volumes, continued execution of our cost productivity initiatives and improved pricing, (vii) warranty exposures (including the adequacy of our warranty reserves), (viii) our ability to successfully resolve the issues associated with the Walter Tax Liability and other significant legal proceedings, claims, lawsuits or government investigations, (ix) compliance with environmental laws and regulations, (x) alleged or actual violations of trade or anti-corruption laws and regulations, (xi) failure to realize, or a delay in realizing, all of the anticipated benefits of our acquisitions, joint ventures or divestitures, (xii) adverse effects of unexpected events including natural disasters and (xiii) other factors that are described in the section entitled "RISK FACTORS" in Item 1A of our Quarterly Reports on Form 10-Q and most recently filed Annual Report on Form 10-K. Undue reliance should not be placed on any forward-looking statements. We do not have any intent to update forward-looking statements, except as required by law.

About Mueller Water Products, Inc.

Mueller Water Products, Inc. (NYSE: MWA) is a leading manufacturer and marketer of products and services used in the transmission, distribution and measurement of water in North America. Our broad product and service portfolio includes engineered valves, fire hydrants, pipe connection and repair products, metering products, leak detection, and pipe condition assessment. We help municipalities increase operational efficiencies, improve customer service and prioritize capital spending, demonstrating why *Mueller* Water Products is Where Intelligence Meets Infrastructure®.
