

# Echologics Signs Service Agreement for Transmission Main Leak Detection With the City of Tampa Water Department

---

April 18, 2012

ATLANTA, April 18, 2012 (GLOBE NEWSWIRE) -- [Echologics](#), a division of Mueller Co. and a developer and leading provider of acoustic-based technologies for [water loss management](#), [leak detection](#), and pipe condition assessment, has secured a service agreement with the City of Tampa Water Department. According to the agreement, Echologics will provide the department, which treats and delivers drinking water throughout the Tampa Bay area, with Transmission Main Leak Detection for approximately 7.5 miles of pipe in its water system that is comprised primarily of cast iron.

"The forward-thinking decision of the City of Tampa Water Department to leverage Echologics' Transmission Main Leak Detection service will help it to efficiently improve conservation as well as its sustainability as a relied upon water service provider," said Marc Bracken, Vice President and General Manager of Echologics. "By partnering with Echologics, the department will not only be able to pinpoint costly leaks in its system that are responsible for losing treated water, they will be able to do so without interrupting service or disturbing surrounding infrastructure."

Echologics pioneered the development of a proprietary, acoustic-based system that [non-invasively locates leaks](#) and assesses the structural condition of both water and force mains. Water service providers across North America and in Europe, South Africa, Asia and Australia have leveraged Echologics' technology to prioritize pipeline rehabilitation and replacement plans, and reduce water loss on all classes of pipes, for diameters ranging from 4" to 108". Mueller Co. and Echologics are subsidiaries of Mueller Water Products, Inc. (NYSE:MWA), a leading North American manufacturer and marketer of products and services that are used in the transmission, distribution and measurement of water.

## Safe Harbor Statement

This press release contains certain statements that may be deemed "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements that address activities, events or developments that we intend, expect, plan, project, believe or anticipate will or may occur in the future are forward-looking statements. Forward-looking statements are based on certain assumptions and

assessments made by us in light of our experience and perception of historical trends, current conditions and expected future developments. Actual results and the timing of events may differ materially from those contemplated by the forward-looking statements due to a number of factors, including regional, national or global political, economic, business, competitive, market and regulatory conditions and the following:

- the spending level for water and wastewater infrastructure;
- the demand level of manufacturing and construction activity;
- our ability to service our debt obligations; and
- the other factors that are described in the section entitled "RISK FACTORS" in Item 1A of our most recently filed Annual Report on Form 10-K.

Undue reliance should not be placed on any forward-looking statements. We do not have any intention or obligation to update forward-looking statements except as required by law.

## **About Echologics**

Echologics is a manufacturing, service and marketing company dedicated to helping water utilities reduce water loss with subsequent benefits in monetary, environmental and health costs to the communities. Echologics is a leader in the development of water infrastructure diagnostic technologies for water loss management, leak detection and pipe condition assessment. Echologics, LLC is an affiliate of Echologics Engineering which was founded in 2003 and is based in Toronto.
