

Mueller Delivers Pratt® P77 Perimeter-Seated Bi-Directional Knife Gate Valve for Industrial Applications

September 25, 2023

ATLANTA, Sept. 25, 2023 (GLOBE NEWSWIRE) -- Henry Pratt Company, LLC today announced the unveiling of the Pratt® P77 Perimeter Seated Bi-Directional Knife Gate Valve. Engineered to handle tough slurries and abrasive materials, the P77 meets the rigorous MSS SP-81 standards and offers a range of features and benefits that make it an excellent valve for industrial applications.

Dale Speggen, VP of Specialty Valves for Mueller, stated, "The Pratt P77 Perimeter Seated Bi-Directional Knife Gate Valve is an industry game-changer. With its sealing capabilities and its ability to reduce stress on the packing chamber, the P77 ensures reliable and efficient operation. We are proud to offer this valve, which sets a new standard for performance and reliability."

The P77 Knife Gate Valve has superb sealing capabilities, ensuring a drip-tight shutoff, and preventing the buildup of solids, regardless of line pressure. The valve is designed to eliminate any confusion regarding the direction of isolation, providing clarity and ease of use in demanding industrial environments.

The P77 Knife Gate Valve is designed with multiple rows of packing to reduce stress on the packing chamber, enhancing the longevity and reliability of the valve. The integrated PTFE gate guide reduces wear on the packing, preventing blockages and flow disruptions with its non-stick properties.

Featuring an EPDM perimeter cartridge seat, the P77 Knife Gate Valve resists chemicals and high temperatures while preventing leakage and protecting downstream equipment. By reducing leak paths and extending the life of the packing, this valve minimizes maintenance requirements and ensures smooth operation.

The heavy-duty cast stainless steel body is resistant to deflection from line loads and internal pressure, further enhancing the valve's performance and longevity. The P77 Perimeter Seated Bi-Directional Knife Gate Valve has applications across various industries, including pulp and paper, mining, water and wastewater, and food and beverage.

ABOUT MUELLER WATER PRODUCTS, INC.

Mueller Water Products, Inc. is a leading manufacturer and marketer of products and services used in the transmission, distribution, and measurement of water in North America. Our broad product and service portfolio includes engineered valves, fire hydrants, pipe connection and repair products, metering products, leak detection, pipe condition assessment, pressure management products, and software technology that provides critical water system data. We help municipalities increase operational efficiencies, improve customer service, and prioritize capital spending, demonstrating why *Mueller Water Products is Where Intelligence Meets Infrastructure*®.
