For the full year, net sales were \$1,184.7 million, an increase of 5.7 percent over the prior year. Operating income was \$124.1 million compared with \$97.3 million in the prior year, an increase of 27.5 percent, and adjusted operating income was \$127.2 million compared with \$98.8 million in the prior year, an increase of 28.7 percent. Adjusted EBITDA increased to \$183.9 million from \$158.0 million in the prior year. Free cash flow was \$110.7 million compared with \$77.6 million in the prior year.

"We had a strong fourth quarter with net sales up 9 percent, operating income up 30 percent and adjusted EBITDA up 19 percent," said Gregory E. Hyland, chairman, president and chief executive officer of Mueller Water Products.

"In the fourth quarter, Mueller Co.'s 11.5 percent increase in net sales, 27.2 percent increase in adjusted operating income and 220 basis points improvement in adjusted operating margin to 18.0 percent were primarily attributable to growth in its domestic end markets and improved operating leverage.

"Anvil had its strongest year-over-year net sales growth of fiscal 2014, with fourthquarter net sales increasing 5.4 percent.

"Coming on top of improvements in the three preceding quarters of the year, this quarter's results made fiscal 2014 another strong year for Mueller Water Products. Adjusted income from continuing operations increased 74 percent year-over-year to \$48.9 million. We generated free cash flow of \$110.7 million, an increase of \$33.1 million, or 43 percent, year-over-year; and reduced net debt leverage to 2.1x compared with 3.0x at the end of fiscal 2013. Adjusted EBITDA margin at Mueller Co. was 21.3 percent and at Anvil was 14.1 percent for fiscal 2014.

"We are also pleased with the progress we made in fiscal 2014 in expanding our portfolio of leak detection technologies, including the introduction of 24/7 fixed leak detection monitoring for both transmission and distribution mains. While these solutions were only recently introduced, we are excited about their longer-term growth potential.

"Our 2014 performance also reflects importantly the ongoing operating improvements we have made over the past several years and continue to pursue, as well as the increase in volume we have realized as our end markets have improved."

Fourth Quarter Consolidated Results

Net sales for the 2014 fourth quarter increased \$27.5 million, or 9.4 percent, to \$320.7 million as compared with \$293.2 million for the 2013 fourth quarter, due primarily to higher shipment volumes at both Mueller Co. and Anvil.

Adjusted operating income for the 2014 fourth quarter increased 29.0 percent to \$43.1 million as compared with \$33.4 million for the 2013 fourth quarter. This increase was due primarily to higher shipment volumes at both Mueller Co. and Anvil.

Fourth Quarter Segment Results

Mueller Co.

Net sales for the 2014 fourth quarter increased 11.5 percent to \$213.0 million as compared with \$191.0 million for the 2013 fourth quarter. This increase was due primarily to higher shipment volumes across most business lines.

margin for the 2014 fourth quarter improved 220 basis points to 18.0 percent as compared with 15.8 percent for the 2013 fourth quarter. The improvement was driven primarily by shipment volumes.

Anvil

Net sales for the 2014 fourth quarter increased 5.4 percent to \$107.7 million as compared with \$102.2 million for the 2013 fourth quarter. The increase in net sales resulted primarily from higher shipment volumes and higher prices.

Use of Non-GAAP Measures

The Company reports its financial results under accounting principles generally accepted in the United States ("GAAP"), as well as through the use of non-GAAP measures. The Company presents adjusted operating income, adjusted operating margin, adjusted EBITDA, adjusted EBITDA margin, adjusted income from continuing operations, adjusted income from continuing operations per diluted share, free cash flow, net debt and net debt leverage as non-GAAP measures. Adjusted operating income represents operating income excluding restructuring. This amount divided by net sales is adjusted operating margin. Adjusted EBITDA represents operating income excluding restructuring, depreciation and amortization. This amount divided by net sales is adjusted EBITDA margin. The Company presents adjusted operating income, adjusted operating margin, adjusted EBITDA and adjusted EBITDA margin because these are measures management believes are frequently used by securities analysts, investors and other interested parties in the evaluation of financial performance. Adjusted income from continuing operations and adjusted income from continuing operations per diluted share exclude, on an aftertax basis, discontinued operations, restructuring, certain tax adjustments and expenses related to the early extinguishment of debt. These items are excluded because they are not considered indicative of recurring operations. Free cash flow represents cash flows from operating activities less capital expenditures from continuing operations. It is

presented as a measurement of cash flows because management believes it is commonly used by the investment community. Net debt represents total debt less cash and cash equivalents. Net debt leverage represents net debt divided by trailing 12 months adjusted EBITDA. Net debt and net debt leverage are commonly used by the investment community as measures of indebtedness. These non-GAAP measures have limitations as analytical tools, and securities analysts, investors and other interested parties should not consider any of these non-GAAP measures in isolation or as a substitute for analysis of the Company's results as reported under GAAP. These non-GAAP measures may not be comparable to similarly titled measures used by other companies.

A reconciliation of GAAP to non-GAAP results is included as an attachment to this press release and has been posted online at www.muellerwaterproducts.com.
