Mueller Water Products Releases 2024 ESG Report

August 04, 2025

Report Highlights Several Key Achievements

ATLANTA, Aug. 04, 2025 (GLOBE NEWSWIRE) -- Mueller Water Products, Inc. (NYSE: MWA), a leading manufacturer and marketer of products and solutions used in the transmission, distribution and measurement of water, today released its 2024 Environmental, Social and Governance (ESG) report, sharing the company's ongoing progress to becoming a more sustainable, innovative and impactful organization.

The latest report provides data from 2024 and highlights the company's ESG activities across six key pillars—Products, Environment, Health and Safety, Employees, Communities, and Governance. Key highlights from the report include:

- Successfully identified an estimated 7.7 billion gallons in water loss savings for clients through EchoShore® leak detection since 2020, achieving this milestone three years ahead of our targeted completion date, and set a new goal of identifying a total of 18 billion gallons of water loss by 2029
- Used ~69,900 metric tons of recycled metal vs. ~17,700 metric tons of total waste generated
- Decreased hazardous waste directed to disposal by 21% year-over-year
- Used ~95% recycled metal to produce our products
- Reduced Scope 1 and 2 greenhouse gas (GHG) emissions intensity by 1% year-over-year compared with 2023, which is a notable accomplishment given this was the first full year of operation for the new brass foundry

"Throughout our rich legacy, Mueller has been working to support and enhance our sustainability efforts, and our progress is evident in our 2024 ESG report," said Martie Edmunds Zakas, Mueller's Chief Executive Officer. "Looking ahead, we aim to drive continuing progress through our innovative solutions that help solve real-world problems for our customers, communities and industries alike. We recognize the significant challenges ahead, but with our history, spirit of innovation and dedicated employees, we have shown that we are more than capable of addressing them."
