PUB (Singapore) Selects Echologics for Pipe Condition Assessment

July 11, 2012

ATLANTA, July 11, 2012 (GLOBE NEWSWIRE) -- Echologics will help PUB (Singapore) to assess the condition of its water transmission mains with Echologics' acoustic pipe Condition Assessment service. A division of Mueller Co., Echologics is a developer and leading provider of acoustic-based technologies for water loss management, leak detection, and pipe condition assessment.

PUB is Singapore's national water agency that manages Singapore's water supply, water catchment and used water in an integrated way. It is a statutory board under the Ministry of the Environment and Water Resources.

Echologics was selected as its technology was able to meet PUB's requirements to assess the condition of some of the older transmission mains in its service area and provide information which can be used as part of its ongoing asset management strategy.

Echologics will acoustically survey approximately 1.6 km of cast iron and steel water transmission mains (which range from 500mm-800mm in diameter) in the PUB's service area to non-invasively detect leaks and measure the mains' effective wall thickness. By obtaining these measurements non-invasively, Echologics can help the PUB to obtain further information to help develop future rehabilitation programs for some of its key assets.

Echologics pioneered the development of a proprietary, acoustic-based system that non-invasively locates leaks and assesses the structural condition of both water and force mains. Transmission Main Leak Detection from Echologics is unique in that it can non-invasively detect and pinpoint leaks over considerable distances without disrupting water service or requiring specialized ports, closure of service laterals or flow alterations.

Water service providers across North America and in Europe, South Africa, Asia and Australia have leveraged Echologics' technology to prioritize pipeline rehabilitation and replacement plans, and reduce water loss on all classes of pipes, for diameters ranging from 4" to 108".

Echologics and Mueller Co. are subsidiaries of Mueller Water Products, Inc. (NYSE:MWA), a leading North American manufacturer and marketer of products and services that are used in the transmission, distribution and measurement of water.

Safe Harbor Statement

This press release contains certain statements that may be deemed "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements that address activities, events or developments that we intend, expect, plan, project, believe or anticipate will or may occur in the future are forward-looking statements. Forward-looking statements are based on certain assumptions and assessments made by us in light of our experience and perception of historical trends, current conditions and expected future developments. Actual results and the timing of events may differ materially from those contemplated by the forward-looking statements due to a number of factors, including regional, national or global political, economic, business, competitive, market and regulatory conditions and the other factors that are described in the section entitled "RISK FACTORS" in Item 1A of our most recently filed Annual Report on Form 10-K.

Undue reliance should not be placed on any forward-looking statements. We do not have any intention or obligation to update forward-looking statements except as required by law.

About Echologics

Echologics is a manufacturing, service and marketing company dedicated to helping water utilities reduce water loss with subsequent benefits in monetary, environmental and health costs to the communities. Echologics is a leader in the development of water infrastructure diagnostic technologies for water loss management, leak detection and pipe condition assessment. Echologics, LLC is an affiliate of Echologics Engineering which was founded in 2003 and is based in Toronto. For more information about Echologics, visit www.echologics.com.

About Mueller Water Products, Inc.

Mueller Water Products, Inc. (NYSE:MWA) is a leading manufacturer and marketer of products and services used in the transmission, distribution and measurement of water. Our broad portfolio includes engineered valves, fire hydrants, metering products and systems, leak detection and pipe condition assessment. We help municipalities increase operational efficiencies, improve customer service and prioritize capital spending, demonstrating why Mueller Water Products is Where Intelligence Meets Infrastructure™. The piping component systems produced by Anvil help build connections that last in commercial, industrial and oil & gas applications. Visit us at www.muellerwaterproducts.com.
